

Dear Friends and Family,

We hope that you and your loved ones are healthy and staying safe in these uniquely challenging times.

We would like to introduce ourselves. We, Jacqueline Wachsberg and Daniel Wachsberg, are 23 years old and 21 years old, respectively. Together we are the co-chairs of Muskoka Motor Rally benefitting the Emergency Medicine Department at Toronto General Hospital and Toronto Western Hospital, altogether are Nation's largest institution of Emergency Medicine (TGH).

Philanthropy matters most in these times and we have decided to invest our Summer months assisting those in greater need. In this regard, we are emotionally and intellectually committed to this greater cause.

TGH is the ranked the number four hospital in the world, by *Newsweek*, and proudly our own. The Emergency Medicine Department is the national referral center for the most compromised and complex patients, acting as the front line of the COVID-19 pandemic, and the first point of contact and triage for most patients entering our leading hospital.

On August 29th, 2020, we will be hosting our very first car rally, followed by a cocktail reception with a silent auction and guest speaker from the Emergency Medicine Department. The net proceeds from this event will benefit the Emergency Medicine Department and will enhance and expand their Emergency space in order for them to continue providing their exceptional care.

We kindly ask for your support for this most worthy cause, which benefits us all. We hope that we can count on your support of the cause to transform the patient experience at TGH. Please feel free to contact us.

Sincerely,

Jacqueline & Daniel Wachsberg
